On behalf of the worldwide Airtech Advanced Materials Group team and in particular, Airtech Europe, located in Differdange, Luxembourg, we are deeply honored to be recognized by Fischer Advanced Composite Components (FACC), as an essential supplier and the first to be awarded the "Special Performance Award". To be selected from 500 suppliers, speaks highly of our Luxembourg team and our commitment to service and quality.

Airtech has been working with FACC from their very beginning, when skis dominated their production. Mr. Walter Stephan (now CEO), told me he was going to look for aerospace work and develop a state of the art composite center and we were there, helping with contacts and product advice.

To watch your progress over the past 25 years has been exciting. I have never seen a company become a worldwide name in composites in such a short period of time. It seems every year I was being invited to a FACC grand opening of yet another building, at their composites center. The growth was in many programs because your quality and reputation was becoming well known, by all the major aircraft producers.

We too have spent a lot of time and money to keep up with the fast moving and growing advanced composites industry. This includes bigger, faster and more equipment, new quality systems, training centers, and 4 worldwide locations to count on for support and products.

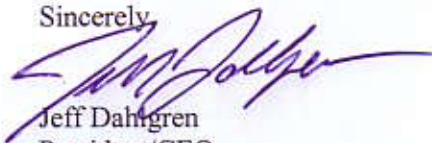

Our quality statement is "Quality is not an act, it is a habit". This famous quote from Aristotle applies to both of our companies. This is the most important service we can offer FACC along with the support of our excellent distributor who shares in this award, Aero Consultants.

We are currently in the process of doubling the size of our Luxembourg facility, again. We want to be ready for the further growth in our industry and in particular, FACC!

Thank you again for this recognition and understand how greatly we value your support throughout the 25 year relationship.

From the worldwide Airtech Team, we wish you continued success!

Sincerely,

Jeff Dahlgren  
President/CEO

Airtech Advanced Materials Group

**MORE THAN A MANUFACTURER...A TECHNICAL PARTNER!**
